Location: Cairo, Egypt (Open to relocate)

Professional Summary

Software Engineer with over 5 years of experience building web applications, RESTful APIs, and distributed microservices using C#, .NET Core, SQL Server, and AWS, with hands-on experience developing front-end features in Angular. My work includes integrating external services, building messaging systems with RabbitMQ, and developing serverless functions. I focus on writing maintainable code, improving database performance, and delivering reliable applications that meet business and regulatory requirements.

Technical Skills

- **Languages & Frameworks:** C#, .NET / .NET Core, ASP.NET Core, Web API, Entity Framework Core, LINQ
- **Front-End:** Angular, Blazor, JavaScript, HTML, jQuery
- **Databases & Caching:** SQL Server, Redis, Query Optimization
- **Architecture & Messaging:** Microservices, Clean Architecture, CQRS, RESTful API Design, RabbitMQ, Asynchronous Processing
- **Cloud & Hosting:** AWS (Lambda, Cognito, SNS), IIS Deployment & Management, Cloud-Native APIs
- **Engineering Practices:** Unit Testing, Code Refactoring, Agile/Scrum

Professional Experience

Senior Software Engineer | Sure Global Tech (Hybrid)

Mar 2025 – Present

- Designed and built a Meta WhatsApp Business API integration portal using .NET Core and Angular, hosted on IIS, to manage messaging workflows with interactive buttons, lists, and dynamic templates.
- Implemented asynchronous message processing with RabbitMQ to connect internal microservices with Meta's Cloud API, improve delivery reliability, and handle traffic spikes.
- Profiled backend services and optimized API request handling to improve response times across high-volume messaging channels.

Software Engineer | Transflo (Remote)

Apr 2023 – Oct 2024

- Developed serverless RESTful Web APIs using .NET Core and AWS Lambda for enterprise logistics management systems.
- Designed SQL Server relational schemas and optimized EF Core query execution models to accelerate data retrieval across high-volume transaction tables.
- Integrated AWS services including Cognito for authentication workflows and SNS for event notifications across logistics microservices.

Software Engineer | Azentio (Hybrid)

May 2022 – Apr 2023

- Built modular backend microservices using .NET Core, applying Clean Architecture practices to separate core domain logic from infrastructure dependencies.
- Implemented database access layers with EF Core, enforcing transactional consistency and data integrity across core business modules.

- Designed and developed responsive user interfaces using ASP.NET Core Razor Pages.

Software Engineer | Shadi Systems (On-Site)

Dec 2020 – Apr 2022

- Developed enterprise web applications for healthcare and commercial management using ASP.NET Core MVC and desktop frameworks.
- Refactored legacy database queries and unindexed EF Core tracking calls, significantly reducing API execution latency on critical client dashboards.

Key Projects

- **Meta WhatsApp Integration Portal:** Built an enterprise messaging portal using Angular and .NET Core, hosted on IIS, with RabbitMQ for asynchronous, event-driven message processing.
- **Securitization WebApp (FinTech):** Developed a financial application with a Blazor front end and a microservices architecture to handle high transaction volumes and maintain reliability during service failures.
- **Transflo Wallet App:** Engineered a logistics fuel management API using .NET Core and AWS Lambda to track fuel allocation and real-time load transfers.
- **Egyptian e-Invoice WebApp:** Created a tax-compliant invoicing system integrating with national tax authority APIs, utilizing digital security tokens for automated document signing and validation.
- **Egyptian e-Invoice WebApp:** Built a tax-compliant invoicing application using HTML, JavaScript, and jQuery, integrated with Egyptian Tax Authority APIs and digital security tokens to automate document signing and validation.

Education

B.Sc. in Electrical & Computer Engineering

Menofia University — Graduated 2019

Languages: Arabic (Native), English (Proficient)
